# IE Observation Technology Requirements

**IE Observation** is compatible with desktop computers, laptops, tablets, and other web-enabled or internet-connected devices.  Please ensure that your technology meets these requirements for system usage. We recommend the use of IE Observation, Academy and Fidelity on a laptop or tablet device.

| Requirements | Details |
|---|---|
| Web Browser: | Any modern HTML5 Browser with JavaScript enabled are compatible but may not provide an ideal user experience. Chrome and Edge are actively tested and are more likely to provide a better user experience. |
| Internet: | Internet connectivity<br>Wireless connection, 802.11ac recommended<br>Offline capabilities available for some features (observations, notebooks) |
| Optional: | Printer, camera, scanner, word processing and spreadsheet applications, headphones or speakers for video and multimedia<br>Screen Reader:  latest version of JAWS and VoiceOver (Academy only) |
| Handheld or Mobile Version: | Compatible handheld devices require **wireless internet** connection.<br><br>Actual mobile device display experience may vary.<br><br>Current version of mobile device operating systems (OS)*:<br>• Android OS<br>• iOS with Safari browser<br><br>*These devices are not trademarks of Instructional Empowerment and certain restrictions may apply. |
| **Enterprise Readiness** | Enterprise clients can optionally connect to IE Observation via SSO to provide a streamlined login experience for their users. The SSO connection must be SAML 2.0 compliant. |

*Chrome and Android are trademarks of Google. Edge is a trademark of Microsoft. iOS and Safari are trademarks of Apple. Instructional Empowerment does test specific browsers based on market share but does not endorse any browser or software.*
